

### **Focus: One Task At A Time**

Focus is a dynamic todo list for iOS that shows you one task at a time so that you always know exactly what you need to be tackling

1. Order Pizza From Domino's → NOW
2. Pick Up Kids From School → NEXT
3. Get Lunch (w/ John) at Arrillaga → 4/5/23 at 4:15 p.m.
4. Finish Presentation (w/ Jane) at Green → 4/6/23 at 11:59 p.m.
5. Renew Your Passport
6. Meet with the ACLU President → 4/15/23 at 4:00 p.m.
7. Get Groceries From Safeway
8. MATH 51: PSET #1 → 4/10/23 at 11:59 p.m.
9. ECON 23: PSET #1 → 4/21/23
10. Lift Weights at AOERC

Default Date: Today (Current Date)

Default Time: 11:59 p.m.

Default Screen: 0 Tasks Left!

Theme Colors: White (#FFFFFF) Text (Avenir 150 pt) on Watermelon (#FC6471) Background

**User (Opens App) → Presents Task 1 (See Below)**

**User (Swipes Right) → Delete Task 1 From List; Display Task 2**

**User (Swipes Left) → Move Task 1 Behind Task 2; Display Task 2**

**User (Swipes Up) → Exits Application**

### **User (Swipes Down)**

Allows You to Add A Task  
(Ordered Based on Deadline and Importance)

### **More Advanced Ideas**

1. Monetization: Advertisements (Yuck!), Limit Number of Tasks Per Day, Paid Application
2. Connect with GCal, iCal, and Other Calendars For Automatic Task Input
3. Connect with Todoist, Wunderlist, and Other To-Do List Applications
4. Add Counters for Tasks Completed (and Points Earned Based on Task Importance)
5. Edit Theme Colors of Application
6. Notify User After Certain Number of Tasks Are Completed
7. Record Other Metrics About Users and How They Use The Application
8. Move Application to Android and Other Platforms
